## Computer Science and Engineering

2022-23

In Semester Examination - III

Class: BTech Div- A

Roll No.: 43

Problem Statement 1

Problem Statement:

Corona-- Curfew E-Pass Form Application

Full Name

Mobile Number

Address

Purpose?

Vehicle Number

Assume this is the reg.html.

Admin wants to store these values in database table.

Complete this web side scripting technology

a. Write HTML and

b. Assume Database Name: DB and Table name :users

Code:

index.php

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <title>Corona -Curfew E-Pass Form Application</title>
  </head>
  <style>
    input {
      padding: 12px 20px;
      margin: 10px 0;
      display: flex;
      border: 1px solid #ccc;
      border-radius: 4px;
      box-sizing: border-box;
    }
    div {
      background-color: #C4A484;
      height: 500px;
      padding: 20px;
      width: 400px;
      box-sizing: border-box;
      align-content: center;
      margin: 100px;
    }
    input[type=submit] {
      border-radius: 12px;
      border: 0;
      box-sizing: border-box;
      cursor: pointer;
      font-size: 14px;
      height: 50px;
      margin-top: 25px;
      text-align: center;
      width: 25%;
    }
    label{
      float: left;
```

```

        margin:10px;
        font-family: sans-serif;
        color:#4c3228;
        font-style: bold;
    }
</style>
<body>
    <center>
        <div>
            <h2 style="color:#4c3228">Corona -- Curfew E-Pass Form
Application</h2>
            <hr>
            <form method="POST" action="insert.php">
                <label>Full Name :</label>
                <input type="text" name="full_name" id="full_name">
                <label>Mobile No. :</label>
                <input type="number" name="mobno" id="mobno">
                <label>Address :&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;</label>
                <input type="text" name="addr" id="addr">
                <label>Purpose :&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;</label>
                <input type="text" name="purpose" id="purpose">
                <label>Vehicle No. :</label>
                <input type="text" name="vehno" id="vehno">
                <input type="submit" value="submit">
            </form>
        </div>
    </center>
</body>
</html>

```

### insert.php

```

<!DOCTYPE html>
<html>

<head>
    <title>Insert Page page</title>
</head>

<body>

```

```

<center>
<?php
$conn = mysqli_connect("localhost", "root", "", "DB",3307);

// Check connection
if($conn === false){
    die("ERROR: Could not connect. ". mysqli_connect_error());
}

$full_name = $_REQUEST['full_name'];
$mobno = $_REQUEST['mobno'];
$address = $_REQUEST['addr'];
$purpose = $_REQUEST['purpose'];
$vehno = $_REQUEST['vehno'];

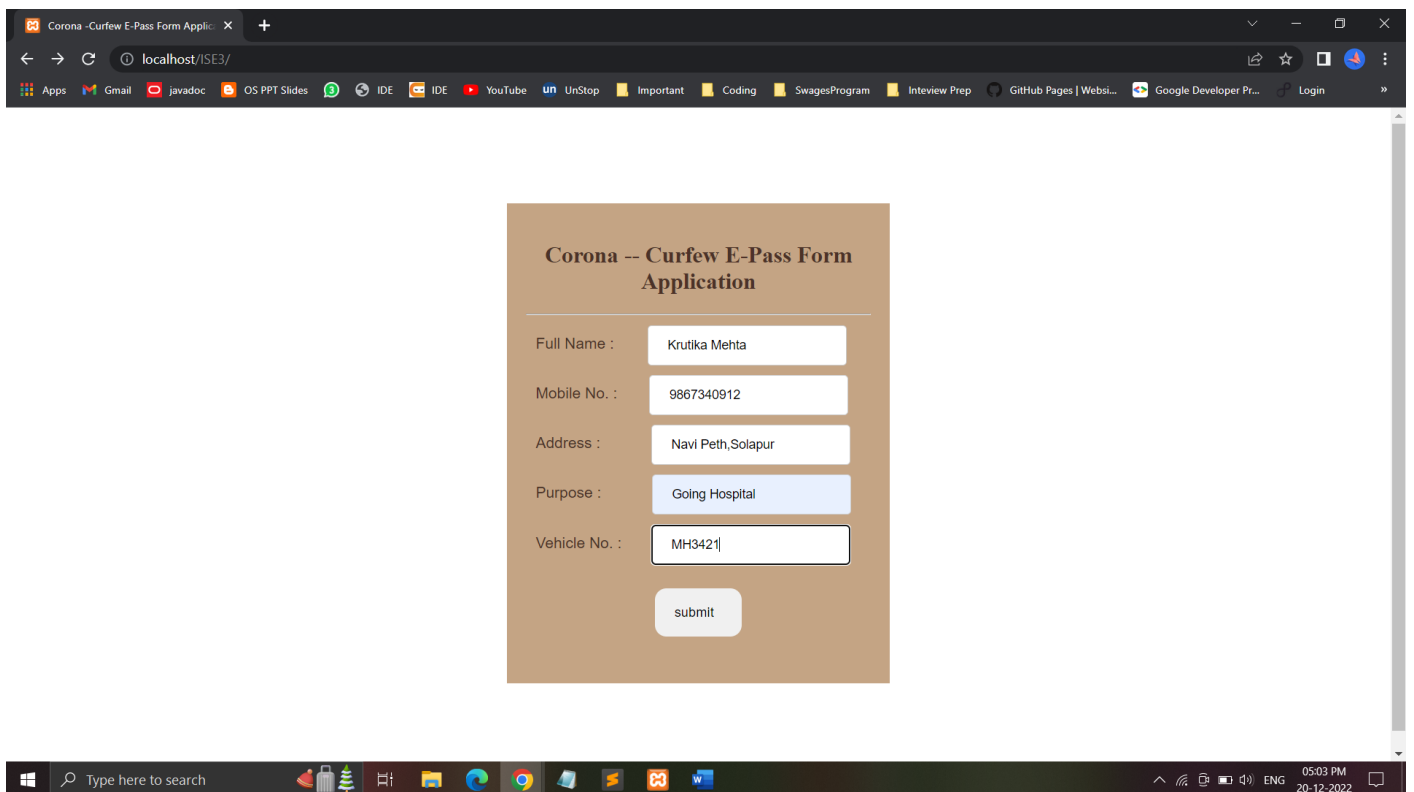

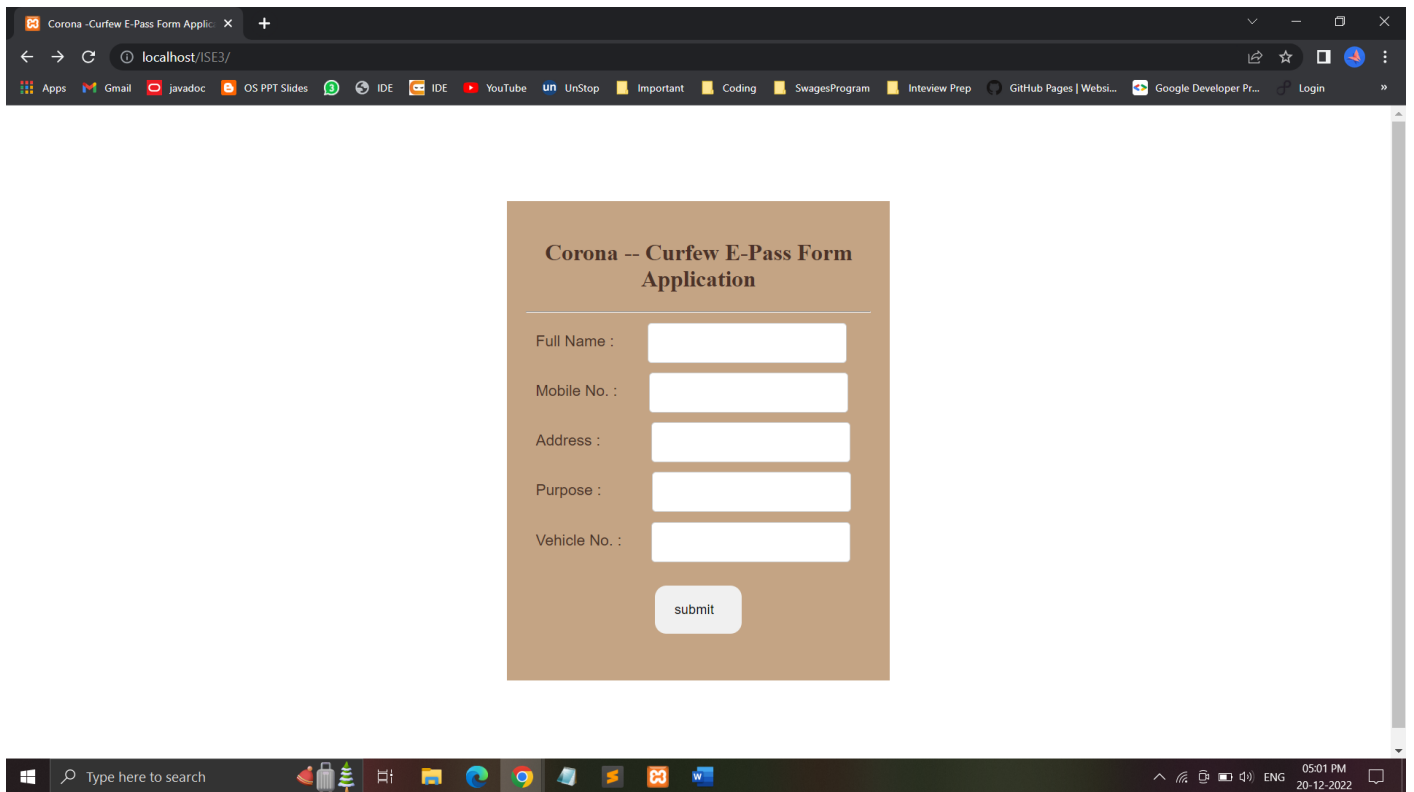

$sql_query="INSERT INTO users
VALUES('$full_name','$mobno','$address','$purpose','$vehno')";
if(mysqli_query($conn,$sql_query)){
    echo "<h3>data stored in a database successfully."
        . " Please browse your localhost php my admin"
        . " to view the updated data</h3>";

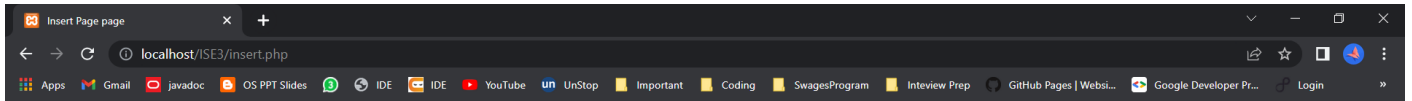

}
else{
